# Explore the art of the possible with BookZurman

As trusted interoperability advisors and experts in the standards community, we focus on work that furthers patient-centered, coordinated care planning and management.

---

## **Pilot Opportunity: CareNexus™ A Care Coordination and Planning Platform**

BookZurman specialists designed CareNexus to showcase how we apply our team's standards expertise to application and implementation.

CareNexus, a coordinated care planning solution, improves care quality and data management by connecting community-based providers and patients, along with others, across a patient's continuum of care.

With a secure, cloud-hosted FHIR application infrastructure, CareNexus enables care team members from multiple organizations immediate access to patient information in one place.

## **BENEFITS**

- Improves communication among patients and cross-community care teams
- Connects easily to health information exchanges (HIEs)
- Provides a cost-effective, streamlined care-management solution
- Shares information with any EHR or care provider
- Extensible for your future requirements through SMART-on-FHIR apps
- Consolidates current systems into one FHIR database

## **FEATURES**

- Secure and scalable
- Modular design
- FHIR standards- and HIPAA-compliant
- Patient engagement
- Single sign-on
- Consent, referral and program management
- Appointment scheduling, task, and activity management
- Alerts and notifications

---

BookZurman – as experts of the interpretation, implementation, and transformation of healthcare IT standards – can build standards strategy and solutions around EHR acquisitions and transitions. We can also help ensure you get what you need, or contracted, for better patient outcomes at less cost.
